Supplier Message

Standard Offer

Your electricity price for Standard Offer service for the period of January 1, 2024 through January 31, 2024 is \$0.107630 per kWh.

About Your Energy Supply

You're on Standard Offer. Did you know you can choose your Energy Supplier? Versant Power does not supply energy, but provides billing & payment services on behalf of your electricity supplier.

Billing Terminology

kWh (kilowatt hour)

The amount of electricity you use is measured in kilowatt hours (kWh) by a meter. For example, a 100-watt light bulb used for 10 hours will consume 1,000 Watt hours, or one kWh.

Estimated Bill

If we are unable to obtain a scheduled meter reading, your bill will be estimated based on the amount of kWh consumed based on past usage.

Sales Tax Exceptions

Maine state sales tax does not apply for the first 750 kilowatt hours (kWh) of residential usage.

Late Payment

The amount not paid by the Due Date on the bill will be subject to a late payment fee of 0.949% on the unpaid balance.

Payment Arrangement

If you have trouble paying your bill, a payment arrangement may help. Please call customer service for more information.

Delivery Rates

Maine's rates are approved by the Maine Public Utilities Commission. Copies of our rate schedules are available online at www.versantpower.com

Distribution

This recovers the costs of the local system, poles, wires and substations, that delivers power from the transmission system to your home or business.

Transmission

This recovers the costs of the high-voltage system that transports bulk power.

Stranded Costs

These include the costs of energy resource obligations entered into before electric industry restructuring. Also included are costs and benefits related to more recent long-term contracts required through state policy, such as contracts with renewable generators.

Conservation

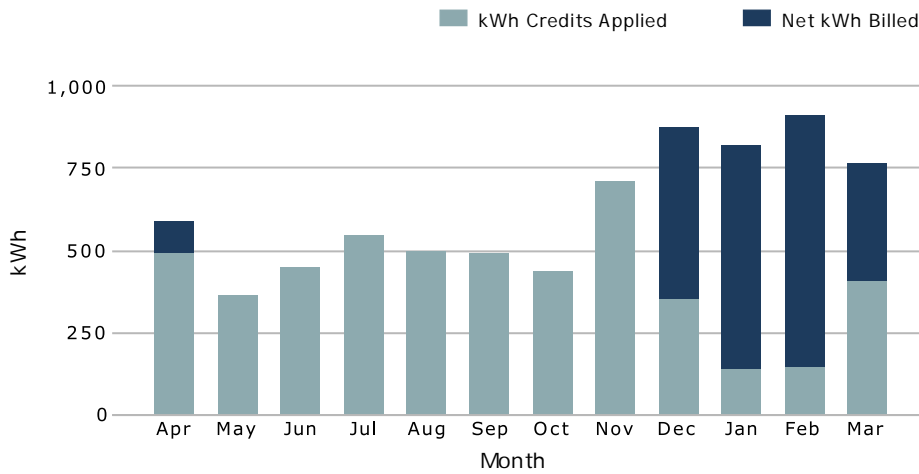

Efficiency Maine Trust was created by the Legislature to deliver energy efficiency programs and services. It is funded in part by Conservation, a fee on electricity use.

Net Energy Billing Terminology

Net Energy Billing

Net Energy Billing credits are earned when a renewable energy source, such as wind or solar, produces excess electricity that was not used at the time of generation. Credits can be in units of kilowatt-hours or in dollars, depending on the net energy billing program.

Credits Generated

Generated credits are the total amount of credits earned from your own excess renewable energy generation, such as solar panels on your roof, during this billing period.

Credits Distributed

Distributed credits are credits that have been allocated to a customer account based on the contract agreement. These could be distributed from a community solar program or from an individual's renewable energy system.

Credits Received

Received credits are new credits that are made available on your account during the current billing period. These could have been distributed from a renewable energy generator to you or could be from your own renewable generation.

Credits Applied this Period

This refers to the amount of credits applied to the bill during a specific billing period.

Credits Expired

Credits expire on a rolling basis twelve months after they are earned. Once a credit expires, it is no longer available to be applied to the bill.

Net Change in Credits

Your net change is the difference between incoming credits and outgoing, used, and expired credits for this billing period.

Credit Closing Balance

Refers to the amount of credits you have remaining in your bank and that are available to use.

Your Supply Service

Your electricity is provided by suppliers licensed by the Maine Public Utilities Commission for electric energy and capacity. Customers can choose their supplier. For information on available electricity suppliers, selecting a supplier, or current rates, visit www.maine.gov/meopa

The Maine Public Utilities Commission administers competitive billing for Standard Offer Electricity Supply. Learn more by visiting www.maine.gov/meopa
