## Why are energy bills rising in Maryland?

---

Maryland's energy demand is growing faster than available power supply, driving higher prices and increasing reliability risks. With older plants retiring and much of our power coming from out of state, market costs rise even when your usage doesn't. BGE is supporting customers through assistance programs, reliability investments, and long-term solutions that put customers first.

Visit [bge.com/EnergyCosts](https://www.bge.com/EnergyCosts) or scan the QR code to learn more.

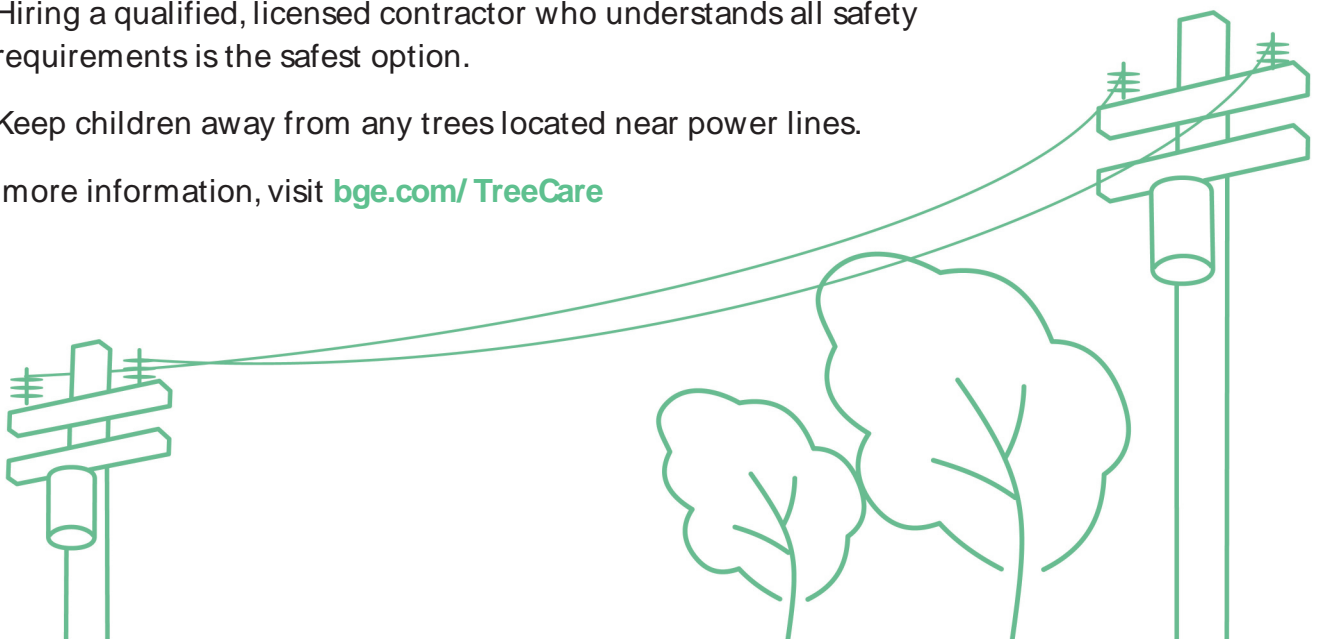

## Vegetation management

---

If you need tree trimming near service wires, between poles, or on or near your property, please review the guidance below:

- Never climb or trim trees that are close to power lines.
- Maintain at least 10 feet of clearance from any energized lines.
- Hiring a qualified, licensed contractor who understands all safety requirements is the safest option.
- Keep children away from any trees located near power lines.

For more information, visit [bge.com/TreeCare](https://www.bge.com/TreeCare)

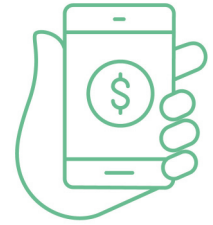

## Call 811 before you dig!

Hitting an underground utility line can endanger you and others, interrupt service to entire neighborhoods, and lead to fines and repair costs under Maryland's Miss Utility law. Never assume you know what's underground. Whether you're tackling a major construction project or a simple home improvement task, safe digging starts with calling 811 before every job. Learn more at [bge.com/811](https://bge.com/811)

## Connected rewards

Earn bill credits this summer. When energy demand is high, Connected Rewards briefly adjusts your smart thermostat by just a few degrees. You'll earn \$10 in bill credits each month you participate, and you can opt out of adjustments at any time. Enroll now at [BGESmartEnergy.com/CR](https://BGESmartEnergy.com/CR)

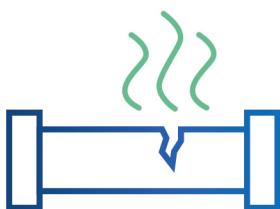

## In the neighborhood

BGE was proud to return as a 2026 CAA sponsor and to relaunch our future-focused *Excellence in Energy* panel at the CAA Tech Summit Day. The event featured a robust discussion on "Energy + Tech Convergence: Utilities at the Center of a Rapidly Changing Landscape." Industry leaders explored how utilities were driving digital transformation, innovation, and the future of clean, connected energy. See more ways good energy connects us with our communities at [bgenow.com](https://bgenow.com)

## Natural gas safety

Gas is colorless, tasteless, and odorless in its natural state. Therefore, BGE puts mercaptan, a safety additive in natural gas to give it a rotten egg odor and make it easier to detect. When you call, BGE will respond promptly to survey the area, perform safety measures, and repair BGE's equipment. There is no charge to investigate a gas leak. If you detect a natural gas leak, leave immediately and go to a safe place, at least 100 feet away, then call **911** OR **877.778.7798**. Visit [bge.com/GasSafety](https://bge.com/GasSafety) for more natural gas safety information.
